CHIP IN TO BRIDGE THE GAP IN CANCER CARE

15 years!!!

The Chipping for Cancer Care and Prevention Golf Outing on September 20th will be the 15th edition of the event. We look forward to celebrating this milestone with you!

Over the years this event has helped us raise hundreds of thousands of dollars to bridge the gap in cancer care for those facing breast, cervical, and abdominal cancers. It has made it possible for us to empower the patient journey and support cancer prevention services, early detection, treatment, and patient navigation programming. We created an accessible mobile app for patients to easily identify care options. We have developed mental and social health resources. We promote cervical cancer prevention through HPV vaccination and health literacy education. Our services offer continued training for medical care professionals. And we established a self-sustaining clinic in Colombia.

Partners for Cancer Care and Prevention knows that the best way to save the lives of cancer patients is through early diagnosis and referral to appropriate treatment. This fact has been borne out through our work mitigating the obstacles women face in their breast and cervical cancer journeys, and it is strikingly evident for patients diagnosed with rare abdominal cancers. Today, many abdominal cancer patients are referred to critical treatment too late and the possibility of providing benefit is greatly decreased. We are working to get patients connected to the information and care that they need when there is still time! And for anyone who has faced a cancer diagnosis – whether as a patient, caregiver, or loved one – you know that fighting cancer is so much more than just about medical health. Fighting cancer is also an emotionally and mentally difficult experience. We amplify the medicine in cancer treatment and strive to make sure that every patient is connected to the emotional, social, and experiential support they need to confidently fight!

By purchasing a sponsorship for the 2024 Chipping for Cancer Care and Prevention Golf Outing, your contribution helps us deepen our service to the patient journey, extend our reach to more under-resourced women facing breast and cervical cancer, and save more lives by advocating and spreading awareness about rare abdominal cancers. But most importantly, your support helps us grow the critical infrastructure and connections that will help patients and caregivers access the tools they need to find hope and positivity in the shadow of cancer and face their diagnosis with confidence!

In this packet you will find information about our organization, how we make a difference, and sponsorship opportunities and benefits, along with a sponsorship form. From all of us at Partners for Cancer Care and Prevention, we invite you to help meet the critical need to support underfunded patient advocacy, access to information, and support the patient journey!

Our sponsorships are limited! So if you have any questions about a sponsorship opportunity or would like to talk about how your support will make a difference, we encourage you to reach out to us or visit our website:

**We invite you to become a Partner and help us
Bridge the Gap in Cancer Care!**

OUR VISION

A world where lives are saved because all people have access to the resources needed for the prevention, early diagnosis, and proper treatment of cancer.

OUR MISSION

To advocate for cancer patients by making connections, providing education, and guiding patient navigation to improve the quality and length of their life; with a focus on breast, cervical, and abdominal cancers.

OUR WORK

This patient-driven initiative is a central education and information hub providing the latest resources and information to patients and families about abdominal cancers and treatment options, including the CRS-HIPEC procedure.

The Abdominal Cancers Alliance unites patients, caregivers, partnering organizations, and the medical community to invest in advocacy, life-saving connections, and the patient journey from diagnosis through treatment and survivorship.

Our work around breast and cervical cancers focuses on mitigating the obstacles women face in their cancer journeys by bridging the gap in cancer screening and treatment in Cali, Colombia.

This work is alongside a Human Papilloma Virus (HPV) vaccination program for female secondary school students to enhance cervical cancer prevention in the community and continued medical education programs for local medical professionals.
